The Concept

The concept of an International Special Operations Forces (SOF) Coordination Center (ISCC) conceived to operationalize the vision of the Commander, U. S. Special Operations Command (USSOCOM) to strengthen the Global SOF Network (GSN) and to support its regional operational hubs

“To achieve my vision of including partner nation SOF representatives into the SOF headquarters, we will provide the greatest possible access to our facilities as well as appropriate access to our communications and information sharing systems.”—ADM Bill McRaven, September 2011
The OV-1 View

| **Tier 1: Force Support/ Force Application** | RC-1: A single, global entry point for SOF coordination. Organization structure established as point of fusion for US and Partner Nations to execute strategies
Timeliness
Completeness
Operational Trust |
| Tier 2: Force Management                    | Personnel available to fill core organizational structure to execute strategic coordination and support for U.S. or other Allied SOF missions by 2020 | 100% of resources available to execute strategic coordination of US and Mission Partner SOF                                                                                                             |                                                                                                                                                              |
| **Tier 1: Battle Space Awareness / Command and Control** | RC-2: Ability to develop and maintain shared situational awareness and understanding with all member nations of the ISCC.
Interoperability
Completeness
Robustness |
| Tier 2: Understand Planning, Direction, Collection, Processing, Analysis, Prediction, Dissemination | ISCC has the required capabilities and training to establish and perform the functions by 2020 | 95% of capabilities are integrated, synchronized and mutually supportive                                                                                                                                 |                                                                                                                                                              |
| **Tier 1: Battle Space Awareness / Command and Control** | RC-3: Ability to coordinate and collaborate with mission partners

| Tier 2: Understand Planning, Direction, Collection, Processing, Analysis, Prediction, Production, and data Dissemination | Leaders and users have access to relevant [need to know] information at all times in the operational environment to support situational awareness.
The ability to develop intelligence requirements, coordinate and position the appropriate collection assets, to ensure robust situational awareness and knowledge of intended domains | 98% accuracy of translation
85% of mission partner capabilities are integrated, synchronized and mutually supportive IAW collective risk assessment |                                                                                                                                                              |
| **Tier 1: Building Partnerships**           | RC-4: Ability to codify and identify international SOF requirements and areas requiring de-confliction and synchronization with U.S initiatives and programs
Understanding
Accessibility
Operational Trust |
| Tier 2: Shape                               | Rapidly identify, establish and facilitate appropriate relationships, collaboration and communications with mission partners | 95% of critical information available to individual responsible for action within time to react
85% of mission partner capabilities are integrated, synchronized and mutually supportive IAW collective risk assessment |                                                                                                                                                              |
| **Tier 1: Building Partnerships**           | RC-5: Receive standing authority designation from OSD-P to be the sponsor for SOF international standardization agreements (ISA) and support development of Multinational publications as needed to support advancement of GSN |
| Tier 2: Shape                               | Rapidly identify, establish and facilitate formal guidance as appropriate to enhance relationships, collaboration and communications with Mission Partners | 95% of critical information available to individual responsible for action within time to react
85% of Mission Partner capabilities are integrated, synchronized and mutually supportive IAW collective risk assessment |                                                                                                                                                              |

The J3-I maximizes mission partner nation integration in HQ USSOCOM staff processes to inform strategic planning and resourcing, and accelerate development of multilateral courses of action and cooperation among our global SOF partners in order to support the partner nations, Theater Special Operations Commands and Geographic Combatant Commands.
Where we are Today

J3-International will:

- Facilitate enhanced decision making for US and Global SOF Commanders
- Integrate Partner Nation Representatives into HQ processes
- Enhance cooperation and speed development of multilateral courses of action
